

Zero-Risk Launch Checklist Runbook v5.1

Date: March 27, 2026

Purpose: Operational launch checklist for compliance-critical readiness

A. Legal Ownership and Contacts

- [] Primary statutory owner assigned
- [] Deputy owner assigned
- [] Tertiary incident fallback assigned
- [] Public legal contacts visible: grievance@, privacy@, legal@
- [] L1/L2/L3 escalation chain documented and tested

B. Regulatory Clocks and Incident Readiness

- [] 2h NCII lane tested
- [] 3h govt/court lane tested
- [] 36h standard takedown lane tested
- [] 24h acknowledgement and 7-day resolution workflows tested
- [] 6h CERT-In incident workflow tested
- [] Single-source SLA clock service active
- [] NTP/UTC time integrity monitoring active

C. Moderation and Enforcement

- [] Break-glass automation enabled (disable/freeze/hash block)
- [] Reason codes and appeal workflows active
- [] Statement-of-reasons output available for applicable jurisdictions
- [] Account strike/repeat-offender policy implemented and auditable
- [] No shadow flows: all admin overrides logged

D. Legal Request Pipelines

- [] Law-enforcement intake and authenticity verification workflow active
- [] DMCA notice/counter-notice workflow active
- [] CSAM emergency escalation workflow active
- [] Legal endpoint anti-abuse rate limiting active (/reports, /ncii, /dmca)

E. Data, Privacy, and Retention

- [] Data classification registry active (PII/content/logs/evidence)
- [] 180-day and 365-day retention classes active
- [] Legal hold and WORM evidence controls active
- [] Deletion-vs-retention disclosures reflected in user policy and flows
- [] Rights workflows active: access/delete/export/consent withdrawal/opt-out
- [] Breach notifications ready (regulator + user templates)

F. Tax, Billing, and Subscriptions

- [] GST and LUT controls documented and approved
- [] Invoice schema includes country/tax/FX/payment reference fields
- [] Web and app-store billing boundaries documented
- [] One-step subscription cancellation path tested
- [] Refund/dispute/chargeback SOP tested

G. App Store and Platform Safety

- [] App-store policy checklist passed
- [] Sensitive content detector and restrict/blur behavior active
- [] 18+ gating active platform-wide
- [] Report button available in all relevant user surfaces
- [] Contest-specific terms published

H. Platform Integrity and Vendor Risk

- [] Abuse controls active (rate limit, bot/fake-account controls)
- [] Contest integrity controls active
- [] Search/feed suppression and cache invalidation after takedown active
- [] Critical vendor register complete (payments/cloud/comms)
- [] Vendor fallback playbooks tested

I. Final Go / No-Go

- [] All critical gates passed
- [] Counsel validation completed
- [] Launch approval documented

If any critical item is unchecked, launch is blocked.
